Notebook Core - V3

Class Objective:

To deliver a powerful and progressive core training experience that leaves a lasting impact on clients across all clubs.

This class is designed to challenge core strength, stability, and control through dynamic, structured, and motivating sequences.

Version V3 elevates the training level with new approaches, functional movements, and a methodology aimed at enhancing performance while keeping participants highly engaged.

Overview:

- **Duration of Each Exercise:** 45 seconds
- **Rest Between Exercises:** 15 seconds
- **Rest Between Circuits:** 1 minute and 30 seconds

Structure:

- Composed of 3 circuits, each containing 8 exercises.
- The fourth circuit consists of two AMRAPs of 3:30 minutes each, with 1 minute of rest in between. You can choose or freely organize exercises from the previous 3 circuits.
- Each circuit includes kettlebell exercises aimed at increasing heart rate and improving force transfer, which is one of the core's main functions.

6. Stretching

Introduction

This training program is designed to enhance overall physical fitness, boost endurance, strengthen the core, and improve performance. It is divided into two versions to accommodate different time constraints: a 45-minute version, which includes a warm-up (Warm-Up), four exercise circuits (Circuit 1, Circuit 2, Circuit 3, and Circuit 4), and a recovery stretching session (Stretching); and a 30-minute version, featuring a warm-up, three exercise circuits (Circuit 1, Circuit 2, and Circuit 3), and the stretching session.

Each circuit is structured to focus on different muscle groups and skills, ensuring a well-rounded and effective workout. Every section of the program has been carefully designed with coaching instructions to maximize performance and understanding, providing clear guidance throughout the training.

1. Warm-Up

#	Exercise Name	Exercise Time
1	High Knees	30 sec
2	Squat to Reach	30 sec
3	Inchworm to Plank	30 sec
4	Jumping Jacks	30 sec
5	Lunge with Rotation	30 sec
6	Plank Shoulder Taps	30 sec

2. Circuit 1

#	Exercise Name	Exercise Time	Rest Time
1	Squat jump and alternative catch	45 sec	15 sec
2	Crunch - forehead to knee	45 sec	15 sec
3	2x crunch + forehead to knee	45 sec	15 sec
4	Military bear press	45 sec	15 sec
5	Around the world - kettlebell	45 sec	15 sec
6	Cross crunch press	45 sec	15 sec
7	Double crunch twist + press	45 sec	15 sec
8	Plank - cross press	45 sec	15 sec

#	Name	Exercise	Coaching
1	Squat jump and alternative catch		Toes outside, keep the back straight
2	Crunch – forehead to knee		Head to knees, exhale, press the legs toward inside
3	2x crunch + forehead to knee		2 crunches, head to knees, exhale, press the legs toward inside
4	Military bear press		Fingers pointed in, chest tucked in, knees bended all the time
5	Around the world – kettlebell		Pivot the leg, twist the body, kettlebell to the shoulder
6	Cross 6runch press		Left palm pressing the right knee, right foot pressing the left knee and reverse
7	Double 6runch twist + press		Elbow to knee and the. Left palm pressing the right knee, right foot pressing the left knee and reverse
8	Plank – cross press		Turn to the side while pressing the floor with opposite limbs, press the knee with the foot that’s in the air

3.Circuit 2

#	Exercise Name	Exercise Time	Rest Time
1	Kettlebell Swing	45 sec	15 sec
2	Bridge plank	45 sec	15 sec
3	bridge and marching	45 sec	15 sec
4	Crab bridge - alternate cross touch	45 sec	15 sec
5	Kettlebell - cross lunge	45 sec	15 sec
6	C-crunch with legs on the ground + cross lateral touch	45 sec	15 sec
7	C-crunch with legs in the air + cross lateral touch with extended leg	45 sec	15 sec
8	C-crunch + cross lateral touch + scissors	45 sec	15 sec

#	Name	Exercise	Coaching
1	Kettlebell Swing		- Engage your glutes and drive your hips forward with power — don't lift the kettlebell with your arms." - Keep your chest open, spine neutral, and feel the weight swing from your hips, not your knees.
2	Bridge plank		- Squeeze your glutes like you're holding a coin and keep your pelvis in line — don't arch your back. - Press your heels into the floor, engage your core, and hold tension from shoulders to knees.
3	bridge and marching		- Keep your hips steady and level — don't let them drop when you lift one leg. - Engage your core and glutes before moving the leg; the motion should be controlled with no wobble.
4	Crab bridge - alternate cross touch		- Keep your hips lifted and stable as you reach your hand to the opposite foot — don't let your torso collapse. - Engage glutes and core — control matters more than speed.
5	Kettlebell - cross lunge		- Keep your chest tall and the kettlebell close as you cross the leg behind with control. - Engage your glutes as you rise and prevent the front knee from caving in
6	C-crunch with legs on the ground + cross lateral touch		- Gently round the upper back into a 'C' shape and reach your shoulder toward the opposite knee without pulling your neck. - Keep your feet grounded and your core engaged — the movement comes from the abs, not the neck.
7	C-crunch with legs in the air + cross lateral touch with extended leg		- Extend one leg and curl your shoulder toward the opposite knee in a 'C' shape — keep your core tight and avoid pulling on your neck. - Control the lowering leg — don't let it drop — and keep your lower back pressed into the floor at all times
8	C-crunch + cross lateral touch + scissors		- Perform a 'C' crunch, reach across to the opposite knee, then alternate your legs in a scissor motion — keep your lower back stable. - Pull the belly button inward, relax the neck, and keep your core strong like a plank.

4. Circuit 3

#	Exercise Name	Exercise Time	Rest Time
1	Splits with side swing	45 sec	15 sec
2	Side roll	45 sec	15 sec
3	Side role with extended legs	45 sec	15 sec
4	Side roll with extended legs + crunch touch and hold 3 sec	45 sec	15 sec
5	Step forward lunges with halo	45 sec	15 sec
6	C crunch	45 sec	15 sec
7	Reverse crunch right side left side	45 sec	15 sec
8	Leg raises right side left side	45 sec	15 sec

#	Name	Exercise	Coaching
1	Splits with side swing		From a wide-leg split stance, swing the kettlebell side to side in front of the body to engage the hips, core, and adductors
2	Side roll		Core exercise where you lie on your back and roll your body from side to side using your abs, focusing on oblique activation and core control. Keep your arms and legs extended to increase difficulty and engage the full core.
3	Side role with extended legs		keeping the leg straight throughout. This movement targets the obliques, improves spinal mobility, and challenges core stability.
4	Side roll with extended legs + crunch touch and hold 3 sec		Add a crunch and hold for 3 sec, make sure your obliques are fully engaged.
5	Step forward lunges with halo		Step forward into a lunge then perform a kettlebell halo around your head, keeping your core tight. This combo strengthens the legs, shoulders, and core, while improving balance and coordination.
6	C crunch		curl your upper body and knees toward each other, forming a “C” shape with your spine. It targets the upper and lower abs simultaneously
7	Reverse crunch right side left side		Sit slightly leaned back with hands on the floor, knees bent. Extend your legs out and rotate your hips to the right and left alternately, engaging your lower abs and obliques with each side crunch.
8	Leg raises right side left side		lift both legs up while slightly angling them to the right side, then lower and repeat to the left. This variation targets the lower abs and deeply activates the obliques.

5. Circuit 4

#	Exercise Name	REP
	AMRAP 1	
1	Squat jump and alternative catch	10
2	Military bear press	10
3	C crunch	15
	Break 1 min	
	AMRAP 2	
1	KB swing	10
2	Crab bridge and alternate cross touch	10
3	Step forward - lunges with halo	8

6. Stretching

#	Exercise Name	Exercise Time (sec)
1	Samson stretch right	15 - 20
2	Samson stretch Left	15 - 20
3	Cobra With dorsal flexion	15 - 20
4	Downward facing dog	15 - 20
5	Double knee to chest	15 - 20
6	Trunk rotation	15 - 20
7	Cat \ cow stretch	15 - 20
8	Full V stretch	15 - 20
